Vijayawada , Andhra Pradesh

EDUCATION

B.Tech - INFORMATION

TECHNOLOGY 2023-2027

Prasad V Potluri Siddhartha

Institute of Technology CGPA : 8.14

SKILLS

• Languages :

Programming in C

Programming in Java

• Database : SQL

• Front-end :

HTML5 , CSS3 , JavaScript

• Data visualization :

Tableau , Powerbi

• Methodologies & Architectures :

Waterfall , Agile

CERTIFICATIONS

• NPTEL - Introduction to AI

• Infosys Springboard - Java

Programming

• Cisco Networking Academy –

JavaScript

INTERNSHIPS

• AICTE - Data Analytics

• EDUSKILLS - AI & ML

• Infosys SpringBoard - Data Visualization

PROFILE

Results-driven and detail-oriented aspiring Data Analyst and Frontend Developer with hands-on experience in HTML5, CSS3, JavaScript, SQL, and Power BI. Strong interest in web development, data analytics, and real-world project implementation.

PROJECTS

Recruitment Analysis in IT Sector Using Tableau

Research Paper Published – IRJMETS, Volume 07, Issue 06

Tools: Excel, Tableau

- Analyzed 14 years of recruitment data across Indian IT hubs.
- Cleaned and transformed data to identify hiring trends and skill demand.
- Built interactive Tableau dashboards for year-wise and skill-based analysis.

Advanced To-Do App | [Live Demo](#)

Technologies: HTML, CSS, JavaScript, GitHub Pages

- Developed a responsive and interactive To-Do web application with task creation, editing, deletion, and search functionality.
- Implemented dark mode, task statistics, and Local Storage support for persistent task management.
- Deployed the application using GitHub Pages and maintained the project through GitHub repository management.

Food Trends: Understanding Customer Preferences on Facebook

Tools: Excel, Power BI

- Analyzed Facebook engagement data related to food trends.
- Cleaned and structured datasets for analysis.
- Designed Power BI dashboards to visualize customer preferences.
- Generated insights to support marketing decisions.
